## About

**Creative Full Stack Developer with proficiency using MERN stack technologies.**  
**Seeking to use my knowledge in a full time development position.**

## Projects

### **PicMe | Lead Developer | [github.com/CalebFunderburk/PicMe](https://github.com/CalebFunderburk/PicMe)**

- Hosted a GitHub repository for the group & managed merges with different code bases.
- Used Handlebars to create a front-end that displays dynamic data from the back-end.
- Made a back-end using Sequelize that supports CRUD functionality in the database.

### **Chunk'd | Back-End Developer | [github.com/PuppetAJ/ReactMC](https://github.com/PuppetAJ/ReactMC)**

- Implemented user authentication using JSON Web Tokens.
- Set up GraphQL to run queries & mutations for interacting with the database.
- Used Conditional Rendering in React to display more personalized data to the user.

## Work History

### **AM Technologies | Computer Technician | November 2021 - July 2022**

- Audit & grade devices based on their physical condition & performance.
- Unlock device operating systems to preform memory wipes & testing.
- Salvage & repair laptops using custom & manufacturer parts.

Reason for leaving: Started attending a Web Development Bootcamp at UNCC

## Education

### **Coding Boot Camp Certificate**

University of North Carolina at Charlotte

### **High School Diploma**

Porter Ridge High School

## Skills

GitHub	HTML
Heroku	CSS/SASS
MongoDB	MySQL
Express	NoSQL
Node.js	GraphQL
React	Agile
